

EASE OF LETTING GO

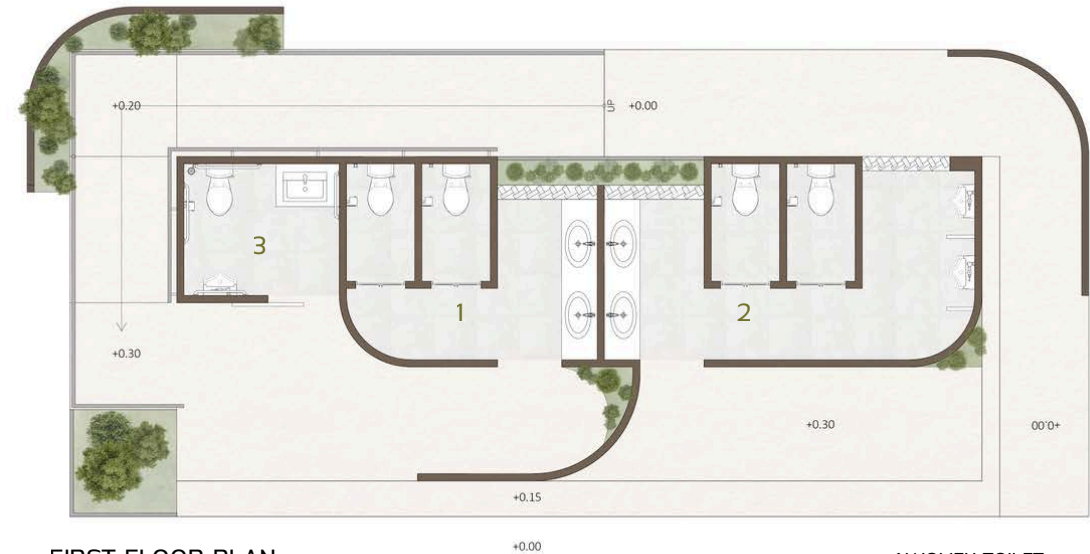

สุขา สุขี : THE HAPPY TOILET

CONCEPT - LIGHT THROUGH FLOW

THE FACADE OF THIS STAND-ALONE BUILDING IS DESIGNED AS AN ELEMENT THAT CONNECTS NATURE AND ARCHITECTURE. IT ALLOWS LIGHT AND WIND TO FLOW CONTINUOUSLY THROUGH THE BUILDING ENVELOPE, SHAPING USERS' SPATIAL PERCEPTION AND EXPERIENCE WHILE ENHANCING NATURAL VENTILATION, DAYLIGHTING, AND ENVIRONMENTAL COMFORT. RATHER THAN ACTING AS A SOLID BOUNDARY, THE FACADE FUNCTIONS AS AN INTERMEDIATE LAYER THAT MEDIATES BETWEEN INTERIOR AND EXTERIOR, CREATING A CALM, OPEN, AND CONTINUOUS FLOW THROUGHOUT THE SPACE.

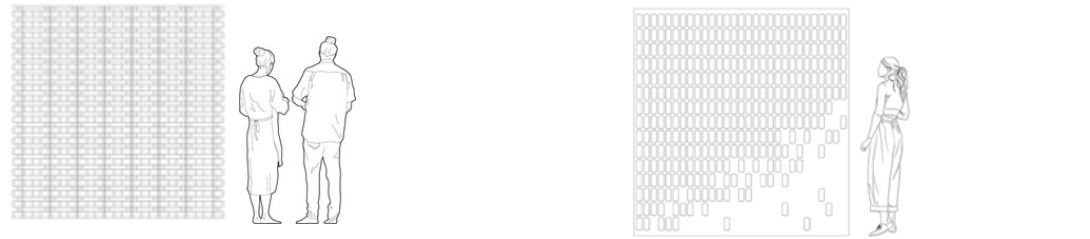

THE CURVED DESIGN AT THE BUILDING CORNERS HELPS SOFTEN THE RIGIDITY OF THE FORM AND ALLOWS LIGHT AND WIND TO FLOW MORE GENTLY, CREATING A CALM AND CONTINUOUS ATMOSPHERE THAT IS HARMONIOUS WITH THE TEMPLE CONTEXT.

FIRST FLOOR PLAN

- 1.WOMEN TOILET
- 2.MEN TOILET
- 3.ACCESSIBLE TOILET

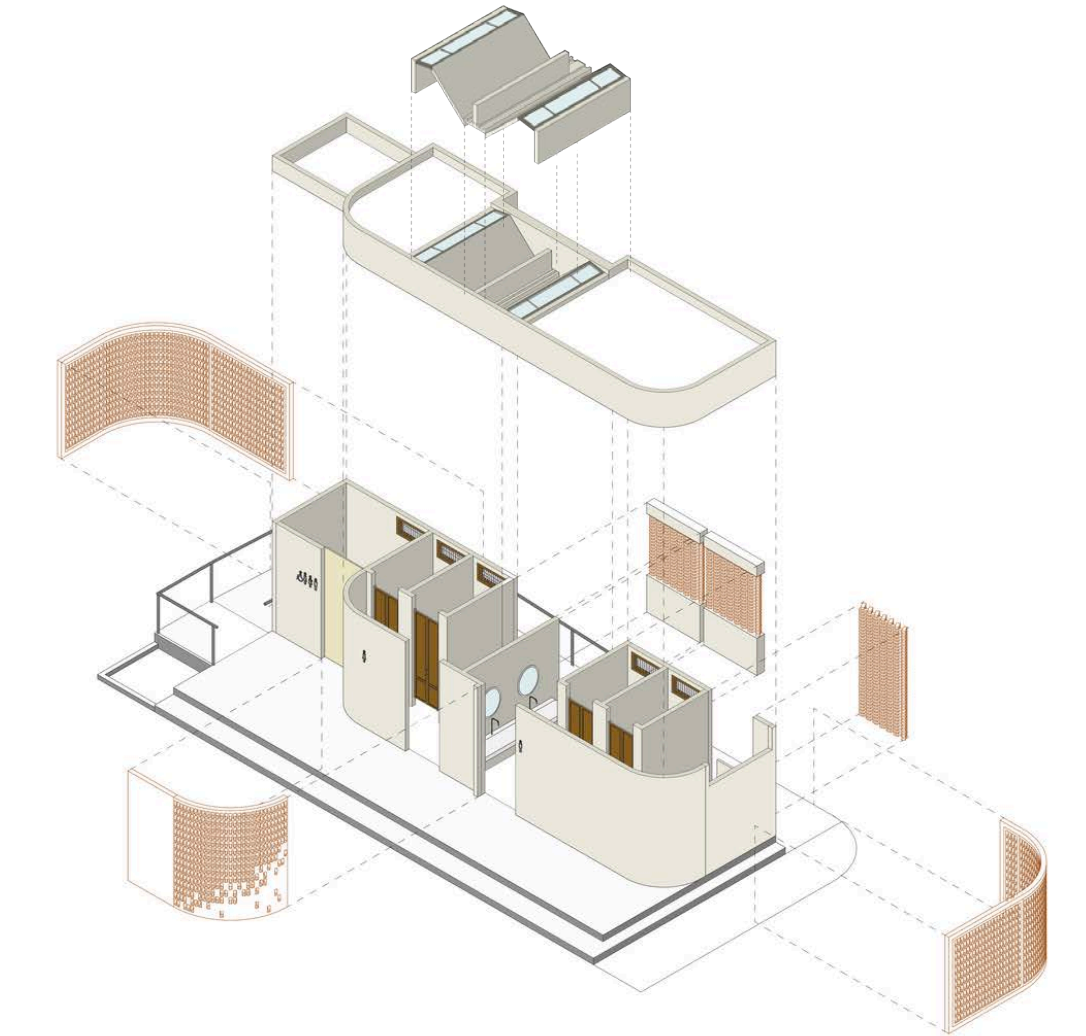

TECHNOLOGY

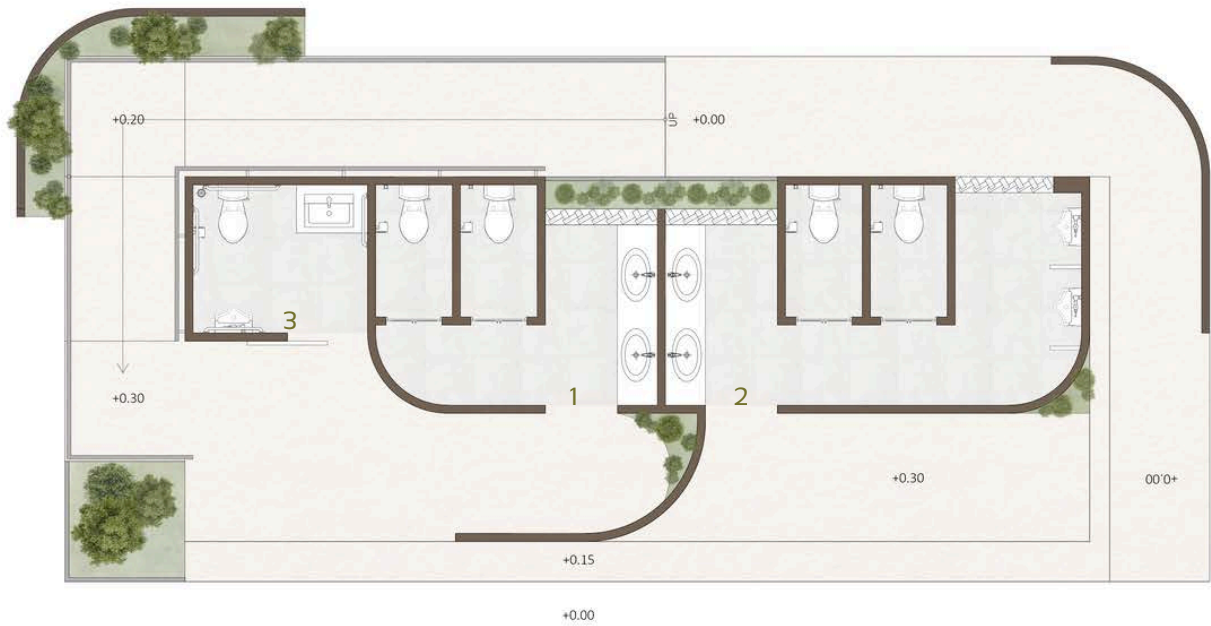

- ช่วงลมช่วยระบายอากาศ
- DAYLIGHT SENSOR ใช้แสงจากธรรมชาติเป็นหลัก
- AUTO LIGHT

MAT SUST

- ผนังคอนกรีต ระบายใช้งานยาว
- กระเบื้องพอร์ซเลนผิวด้าน (กันลื่น)
- ไม้เทียม ซีซีเคิล

PLAN

- 1.WOMEN TOILET
- 2.MEN TOILET
- 3.ACCESSIBLE TOILET
